### **Objective:**

Dynamic and results-oriented Full Stack Web Developer with 9 months of hands-on experience in React.js, Node.js, Express.js, and PostgreSQL, with proficiency in Flask Python and SQLite. Skilled in developing responsive web applications and proficient in WordPress website development. Seeking to leverage expertise to contribute to innovative projects in a progressive organization.

### **Professional Experience:**

#### Full Stack Web Developer

*Imax Global Ventures Ltd, New Delhi-110034*

*July 2023 – March 2024*

- Developed responsive web applications using React.js for the front end and Node.js/Express.js for the back end.
- Implemented and maintained PostgreSQL databases for data storage and retrieval.
- Collaborated with cross-functional teams to ensure timely delivery of high-quality projects.
- Created and customized WordPress websites according to client specifications.
- Conducted thorough testing and debugging of web applications to ensure functionality and performance.

### **Projects:**

yzulu.com

Description: Yzulu, a cutting-edge web application powered by React, Node.js, Express, and PostgreSQL. Designed to streamline the freight industry, Yzulu connects shippers with qualified truckers seamlessly. Shippers can post their loads, while truckers bid competitively for the job. Once selected, the chosen trucker efficiently transports the cargo from source to destination. Yzulu provides real-time transport status updates, ensuring transparency and reliability for shippers throughout the journey. Revolutionize your freight logistics with Yzulu today.

### Technologies:

- Python Flask (including CRUD application development)\
- Git and GitHub: Experienced in version control with Git and proficient in using GitHub for collaborative software development and project management.
- WordPress, website development, including theme customization, plugin integration, and content management.
- SQLite Database, a lightweight, serverless, self-contained, and open-source relational database management system (RDBMS).
- SQLAlchemy Database, It provides a high-level, expressive abstraction for interacting with databases, allowing developers to work with database models and queries using Python objects and methods
- React: A JavaScript library for building user interfaces, providing a responsive and dynamic front-end experience.
- Node.js: A runtime environment for executing JavaScript code server-side, facilitating the development of scalable and high-performance server applications.
- Express.js: A minimal and flexible Node.js web application framework, simplifying the process of building robust web applications and APIs.
- PostgreSQL: An open-source relational database management system (RDBMS) known for its reliability, performance, and advanced features, used for storing and managing application data efficiently.
